

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Ideation Phase

Empathize & Discover

Date	3 rd October 2026
Team ID	6aba0fe75015c35b98630d90
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

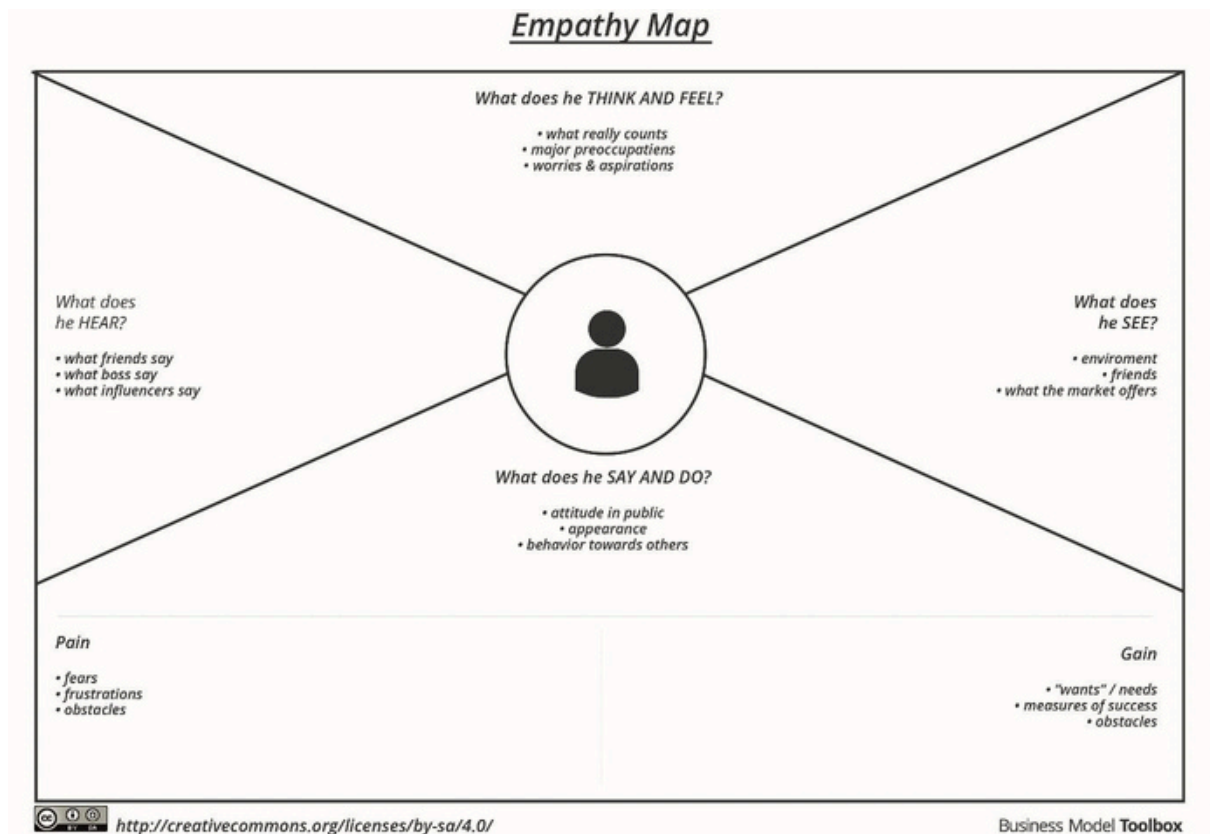

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

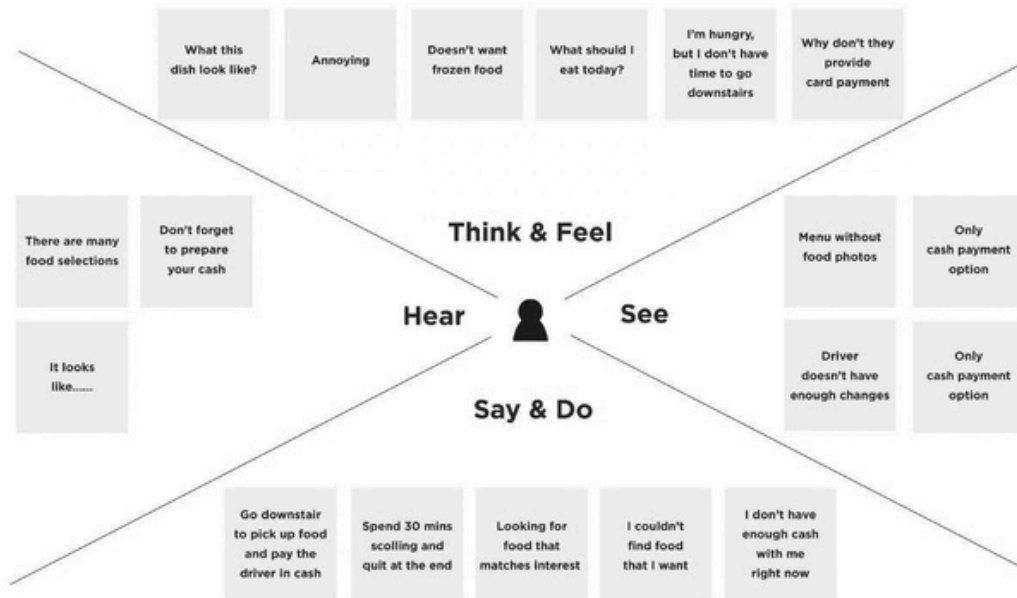

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Empathy Map: Standard Laptop Procurement User

Empathy Map Canvas

SAYS "I need a standard laptop for my work." "Why does a routine laptop request take so long?"	THINKS The process should be simple and transparent. I want to know the status of my request.
DOES Submits a laptop request, provides required details, follows up on approval, and waits for procurement.	FEELS Frustrated by delays, uncertain about request status, and concerned about receiving the laptop on time.
PAINS Manual steps, repeated follow-ups, approval delays, and lack of visibility.	GAINS Faster processing, automated approvals and routing, clear status updates, and a smoother procurement experience.

User Perspective: An employee requesting a standard laptop experiences the procurement process from request submission through approval and fulfillment. The Flow Designer concept focuses on reducing manual effort and improving visibility.
