Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	[Enter Maximum Marks]

1. Purpose of Document

The purpose of this document is to briefly explain the test coverage and open issues of the Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer project at the time of release to User Acceptance Testing (UAT). The report focuses on validation of standard laptop request submission, workflow automation, approval, fulfillment, exception handling, notifications, and status tracking.

2. Defect Analysis

This report summarizes defects identified during UAT by resolution category and severity. Actual defect counts should be updated from the project's defect tracker after execution.

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	0	0	0	0
Duplicate	0	0	0	0	0
External	0	0	0	0	0
Fixed	0	0	0	0	0
Not Reproduced	0	0	0	0	0
Skipped	0	0	0	0	0
Won't Fix	0	0	0	0	0
Totals	0	0	0	0	0

3. Test Case Analysis

This report shows the number of test cases that have passed, failed, and remain untested. The categories below are adapted to the laptop procurement Flow Designer workflow while retaining the template's test-case analysis structure.

Section	Total Cases	Not Tested	Fail	Pass
Laptop Request Submission	2	2	0	0
Request Validation	2	2	0	0
Flow Designer Automation	2	2	0	0
Approval Workflow	2	2	0	0
Fulfillment / Procurement	2	2	0	0
Exception Handling	2	2	0	0
Notifications & Status	2	2	0	0
Totals	14	14	0	0

4. UAT Coverage

- Valid standard laptop request submission.

- Mandatory-field and request-data validation.
- Flow Designer trigger and workflow progression.
- Approval routing and approval/rejection handling.
- Creation of fulfillment/procurement actions after approval.
- Handling of invalid or non-standard requests.
- Requester status visibility.
- Workflow notifications and task assignment.

5. Open Issues / Observations

No project-specific defects or open issues were supplied with the template. Record any issues discovered during UAT in this section and in the defect tracker, including severity, status, steps to reproduce, and additional feedback.

Issue ID	Description	Severity	Status	Remarks
[BG-001]	[Enter issue if identified]	[Severity]	[Status]	[Additional feedback]
[BG-002]	[Enter issue if identified]	[Severity]	[Status]	[Additional feedback]

6. Final Report Output

Final UAT status: [Not Started / In Progress / Completed / Accepted]. The project should proceed to deployment only after applicable test cases have been executed, critical defects have been resolved or formally accepted, and the required UAT sign-off has been obtained.

7. Version Control

Version	Date	Description	Prepared By
1.0	03 October 2026	Initial UAT execution and report template prepared for the automated [Name] and laptop procurement workflow	[Name]
