

Ideation Phase – Define the Problem Statements

Date: 3rd October 2026

Team ID: 6aba0fe75015c35b98630d90

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Maximum Marks: 2 Marks

Problem Statement (PS-1)

I am	an employee who needs a standard laptop for work.
I'm trying to	request and receive a standard laptop through the IT procurement process.
But	the ordering process can involve manual steps, approvals, and delays.
Because	standard laptop requests are not fully automated.
Which makes me feel	frustrated when I have to wait for a routine laptop order.

Problem Statement (PS-2)

I am	an IT procurement team member handling standard laptop requests.
I'm trying to	process standard laptop orders efficiently and consistently.
But	manual processing requires repetitive work and coordination between teams.
Because	standard orders are not automatically routed through a streamlined workflow.
Which makes me feel	overloaded and concerned about delays or inconsistent processing.

Note: The problem statements are based on the project topic and the customer problem statement template provided in the uploaded document.
